

WNT – 03 Multi-point ribbon winder

Machine application:

The multi-point ribbon winder is designed mainly to operate together with the ribbon cutter MKT-01. The machine is capable to operate together with other cutting machines.

Machine description:

Polypropylene ribbons cut on the cutter are then wound up on the disk bobbins.

The thread guide system enables the ribbons under winding to be evenly splitted along the whole bobbin length.

The guide travel adjustment makes it possible to adapt the machine to various ribbon widths.

The inverter-controlled electric motor drive of the machine enables its soft starting and the infinitely-variable winding speed adjustment.

Technical data of multi-point ribbon winder WNT-03:

Description:	Unit:	Quantity:
Number of winding points	pcs	112
Receive bobbin:		
- diameter	mm	80
- length	mm	89
Ribbons width	mm	0,3 – 5
Receive package bobbin:		
- hole diameter	mm	10
- disk diameter	mm	83
- length	mm	97
Winding speed (stepless regulation)	m/min	20 – 130
Speed of thread guide per meter (stepless regulation)	m/min	0,2 – 4
Overall dimensions (length x width x height)	mm	2310 x 900 x 1970
Weight of the machine	kg	300
Power installed	kW	0,4
Power supply	V	3Ph 400/230 N/PE
